

MOTOTRONIC 6-12 230V code 807010

Battery charger with electronic control of charging current, automatic interruption and restart (TRONIC). Equipped with warning leds for correct mains voltage and polarity reversal of the battery. Fit for charging maintenance free, sealed batteries (GEL/AGM) and free-electrolyte batteries (WET) with 6/12V voltage of scooters and motorcycles. A special device (BY-PASS) allows the charge even with extremely low or sulphated batteries.
